SARVANI TOPELLA

Hyderabad, Telangana | +91 9848271788 | 2420030367cse@gmail.com
Linkdin | Portfolio

PROFILE

Computer Science undergraduate specializing in AI and NLP, with hands-on project experience in Python, FastAPI, React and Flask. Built code-intelligence, DevOps-automation and computer-vision applications, and applied them in hackathons and a virtual internship.

EDUCATION

B.Tech, Computer Science and Engineering | KLH Deemed to be University, Hyderabad Expected 2028
CGPA: 9.2/10 | Minor: Business Analytics

Intermediate (MPC) | Ignite Junior College, Hyderabad 91.7%

Secondary School | Matrusri DAV Public School, Hyderabad 89.9%

TECHNICAL SKILLS

Programming: Python, Java, C, TypeScript
Web and Frameworks: FastAPI, Flask, React.js, HTML, CSS, REST APIs, SQLAlchemy
AI / NLP and Vision: BERT embeddings, Retrieval-Augmented Generation (RAG), TextBlob, MediaPipe, OCR
Databases: PostgreSQL, Database Management Systems (DBMS)
DevOps and Tools: Git, GitHub, GitHub Actions, Docker, Kubernetes, Trivy, Linux (basics)
Core CS: Data Structures and Algorithms, Object-Oriented Design, Operating Systems, Computer Networks

ACADEMIC PROJECTS

AI Developer Copilot | *BERT, RAG, vector database, LLM*
- Designing a code assistant that combines BERT semantic embeddings, a vector database and an LLM to retrieve relevant code and generate context-aware explanations, summaries and dependency analysis.
- Planning evaluation of retrieval quality using Precision@K and Recall@K.

DevSight AI | *Python, FastAPI, React.js, TypeScript, Docker, Trivy, SQLAlchemy*
- Developed a full-stack platform that analyzes repositories for code-quality issues, hardcoded secrets and insecure practices, and scans Docker images and dependencies with Trivy by severity (Critical to Low).
- Automated generation of Dockerfiles, Docker Compose files, CI/CD workflows and Kubernetes manifests, with a dashboard for code health, security findings and DevOps readiness.

OpsPilot: AI-Powered DevOps Incident Management System (SOA Project) | *React 19, TypeScript, Tailwind CSS, Chart.js, PostgreSQL, Drizzle ORM*
- Built a service-oriented architecture with a REST API gateway and separate incident, log, analysis and notification services, covering the full incident lifecycle with a live dashboard.
- Implemented rule-based log analysis that classifies incidents and suggests severity, probable root cause and recommended actions.

AirScript AI | *Python, MediaPipe, Deep Learning OCR*
- Built a real-time system that recognizes hand gestures and converts air-written input to text using hand pose estimation and OCR, integrated as a single AI pipeline.

AI-Powered Text Correction Web Application | *Flask, PySpellChecker, TextBlob*
- Developed an NLP web application that performs automated spelling and grammar correction through a responsive interface.

Student Management System | *Structured programming*
- Designed an application to manage student records with create, read, update and delete (CRUD) operations.

EXPERIENCE

Virtual Intern, Artificial Intelligence | Pinnacle Labs (Remote) May 2026 – June 2026
- Developed a Python Resume Analyzer for resume parsing, skill extraction and candidate evaluation.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) | Microsoft Certified: Azure AI Fundamentals (AI-900)
- Java Programming and Software Engineering Fundamentals (Coursera) | Python Data Structures (University of Michigan)
- Dynamic Programming and Greedy Algorithms (University of Colorado) | Cloud Computing Fundamentals (IBM)

HACKATHONS AND LEADERSHIP

- UIDAI Data Hackathon: developed an AI-powered Duplicate Risk Intelligence System to detect and analyze potential duplicate Aadhaar records.
- Participant, Microsoft Hackathon | Campus Ambassador, Skillegence (IIT Hyderabad workshop).
